

# THE SUSTAINABILITY CONSORTIUM

## Vision

The Sustainability Consortium is advancing science to drive a new generation of innovative products and supply networks that address environmental, social and economic imperatives.

## Mission

TSC's mission is to collaborate to design and implement credible, transparent and scalable science-based measurement and reporting systems accessible for all producers and users of consumer products.

## Values

- ➔ Collaboration of diverse participants
- ➔ Scientific integrity
- ➔ Comprehensiveness and holism
- ➔ Transparency and accessibility
- ➔ Progress and solutions orientation

## Propelling Business Forward

For suppliers, manufacturers, and retailers, membership in The Sustainability Consortium is a chance to participate in a transformative project. The Consortium will change the way product value is measured and transform the consumer market. A new generation of products and supply networks will arise, along with opportunities for innovation across the entire life cycle of any given product. Consider the benefits of membership for business:

- ➔ Contribute to the creation of new standards for measuring and reporting product sustainability.
- ➔ Participate in sector-specific and Consortium-wide research projects involving product sustainability with the top researchers in environmental science and corporate social responsibility.
- ➔ Interact with many of the premier sustainability firms in the world.
- ➔ Enhance visibility in your supply chain network to identify value and sustainability performance.
- ➔ Gain access to innovative tools, best available science, and technical support to find the biggest business and sustainability opportunities in your value chain using affordable life cycle assessment.
